

General

The DG900 whip antenna is made for use with the ELPRO 900 series telemetry products. The DG900 is fitted with approx 17' / 5m mini coaxial cable and SMA male connector. Further coaxial extensions are not recommended with this antenna.

The DG900 is mounted from the base through a 3/8" (10mm) hole. This compact antenna is designed for short range use where a maximum of 2 miles (3.3 kms) is required.

The antenna is suitable for internal or external mounting. This antenna may be used on vehicles with a suitable bracket not supplied or when mounted in the panel work.

(Bracket not available)

DG900

Specification

Type	Ground independent whip	Length	6" / 150mm
Frequency	900 –930 MHz	Connector	SMA (male)
Impedance	50 Ohms	Gain	-2dBi
Construction	PVC covered
