

General

The SER905 serial configuration lead is ideal for programming the ELPRO 900 series modules. Molded D9 (9 pin) connectors provide a strong and durable lead.

The SER905 is used for programming any of the 900 series modules. Use this lead with the free configuration software supplied separately.

Full programming information may be found in the module user manuals

Specification

Type	Serial lead	Connectors	D9 (1x male 1 x female)
Construction	Molded PVC	Length	78" / 2m
		Color	Off white
		Connection	Straight through DTE-DCE

Telemetry made easy by
