

# Fisher<sup>®</sup> ES and EAS Sliding-Stem Control Valves

Fisher ES and EAS general-purpose control valves (figures 1, 2, and 3) are used for throttling or on-off control of a wide variety of liquids and gases. Both valve designs have single ports, unbalanced valve plugs, and cage guiding.

In both designs, metal-to-metal seating is standard for all general applications over a wide range of pressure drops and temperatures. Metal-to-PTFE seating is optional for more stringent shutoff requirements.

The Fisher ES product line is available for a wide range of applications, including sulfide and chloride stress-cracking environments common to the oil and gas production industries. To discuss available constructions, contact your Emerson Process Management sales office and include the applicable codes and standards required for these environments.

## The easy-e<sup>™</sup> Valve Family

ES and EAS valves are part of the versatile easy-e family of Fisher industrial control valves. easy-e valves share the following characteristics.

- Multiple trim material choices
- Trim temperature capability with standard metal seats to 427°C (800°F)
- Flexible graphite gaskets
- Interchangeable, restricted-capacity trims and full-flow trims to match variable process flow demands
- Trim part interchangeability that permits reconfiguring the valve to a different design variation

W2174-1/IL

Figure 1. Fisher ES Control Valve with 657 Actuator

- Different cage/plug styles provide particular flow characteristics for highly-specialized applications. The standard cage comes in three different flow characteristics:

- quick-opening
- linear
- equal percentage

- Whisper Trim™ I cages (figure 2) that attenuate aerodynamic noise in gaseous service are available for all sizes except the NPS 8 ES valve.

- Optional constructions provide material compatibility with NACE MR0175-2002.

- 316 stainless steel packing box parts are standard (including packing flange, studs, and nuts).

## Features

- **Compliance with the Clean Air Act**— Optional ENVIRO-SEAL packing systems (figure 4) provide an improved stem seal to help prevent the loss of process fluid. The ENVIRO-SEAL packing systems feature PTFE, Graphite ULF, or Duplex packing with live-loading for reduced packing maintenance.

- **Valve Plug Stability**— Rugged cage guiding provides increased valve plug stability, which reduces vibration and mechanical noise.

- **Economy**— Streamlined flow passages provide higher efficiency and greater capacities per initial investment.

- **Cost-Effective Operation**— Increased wear resistance of the standard hardened stainless steel trim means long-lasting service. Also, trim inventory costs are cut because dimensional standardization permits use of most standard easy-e trim parts.

- **Easy Maintenance**— The valve can stay in the pipeline during removal of trim parts for inspection or maintenance.

- **Long-Lasting Shutoff Capability with PTFE Seating**— Controlled compression of optional seat construction protects PTFE disk between metal disk seat and disk retainer (figure 2). The flowstream contacts only the edge of the disk during normal operation.

- **Compliance with European Standards**— Valves are available with dimensions specified by EN/DIN standards. See figure 8 and the note in figure 9.

- **Sour Service Capability**— Unless otherwise noted, references are to NACE MR0175-2002. Optional materials are available to meet NACE MR0103 and NACE MR0175 / ISO 15156. Material requirements under these standards vary by edition and year of issue; the specific standard must be specified.

**ENVIRO-SEAL, HIGH-SEAL Packing Systems**

ENVIRO-SEAL and HIGH-SEAL packing systems offer excellent sealing capabilities. They easily install in your existing valves or can be purchased with new valves. These systems may help prevent the loss of process fluid. The long operational life and reliability of these systems also helps to reduce your maintenance costs and downtime.

For applications requiring compliance with environmental protection regulations, the unique Fisher ENVIRO-SEAL packing system (figure 4) and a unique ENVIRO-SEAL bellows seal system (figure 5) are offered. The emission control packing system helps to keep emission concentrations below the EPA 100 ppm requirement.

For an excellent stem seal in applications that are not environmentally-sensitive, the Fisher HIGH-SEAL

Graphite ULF packing system is offered. The HIGH-SEAL packing system provides excellent sealing at pressure/temperature ratings beyond ENVIRO-SEAL limits.

ENVIRO-SEAL packing systems, available with PTFE, Graphite ULF, or Duplex packing, and the HIGH-SEAL packing systems, Graphite ULF and graphite composite, feature live-loading and unique packing-ring arrangements for long-term, consistent sealing performance.

**Class VI Shutoff Capabilities**

ES valves with metal seat constructions can provide ANSI/FCI Class VI shutoff capabilities. See tables 1 and 2.

	Graphite ULF		

1. These in-body process temperatures assume an outside, ambient temperature of 21°C (70°F) and no insulation on the bonnet. When using any packing at low process temperatures, a cast extension bonnet may have to be used to prevent packing damage which could result from the formation of valve stem frost. Material selection for trim and other components will also be limiting factors.

FOR STANDARD METAL SEATING WITH CL250B <sup>1</sup> CAST IRON BODY

FOR STANDARD METAL SEATING WITH CL600 <sup>1</sup> WCC OR LCC STEEL BODY

FOR STANDARD METAL SEATING WITH CL600 <sup>1</sup> WC9 CHROME MOLY STEEL BODY

FOR STANDARD METAL SEATING WITH CL600 <sup>1</sup> 316 STAINLESS STEEL (CF8M) BODY

FOR OPTIONAL PTFE SEATING WITH ALL BODY MATERIALS <sup>1</sup>

**NOTE:**

<sup>1</sup> DO NOT EXCEED THE MAXIMUM PRESSURE AND TEMPERATURE FOR THE PRESSURE RATING OF THE BODY MATERIAL USED, EVEN THOUGH THE TRIMS SHOWN MAY HAVE HIGHER CAPABILITIES.

<sup>2</sup> BE ESPECIALLY CAREFUL TO SPECIFY SERVICE TEMPERATURE IF TRIMS 3, 4, OR 37 ARE SELECTED, AS DIFFERENT THERMAL EXPANSION RATES REQUIRE SPECIAL PLUG CLEARANCES. ALSO, USE TRIM 37 INSTEAD OF TRIM 4 FOR NONLUBRICATING FLUIDS SUCH AS SUPERHEATED STEAM OR DRY GASES BETWEEN 149 AND 316°C (300 AND 600°F).

<sup>3</sup> TRIMS 4 AND 29 CAN BE USED TO PRESSURE DROP SHOWN ONLY WITH CLEAN, DRY GAS. FOR OTHER THAN CLEAN, DRY GAS, TRIMS 4 AND 29 CAN BE USED ONLY UP TO 21 BAR (300 PSI).

<sup>4</sup> USE TRIM 27 INSTEAD OF TRIM 29 FOR NONLUBRICATING FLUIDS SUCH AS SUPERHEATED STEAM OR DRY GASES BETWEEN 149 AND 316°C (300 AND 600°F).

1. When using Fisher 655-EC as a control valve for on-off service, the maximum travel for sizing purposes is 19 mm (0.75 inch).  
 2. When sizing self-operated regulators, use coefficients listed for 6 mm (0.25 inch) travel.  
 3. At 100% travel.  
 4. Restricted trim

1. At 100% travel.  
 2. If coefficients listed above for the NPS 8 linear cage with 51 mm (2 inch) travel are not sufficient for your application, consider using the quick opening cage. The NPS 8 quick opening cage with 51 mm (2 inch) travel has approximately a linear characteristic.  
 3. Restricted trim.

1. Level D exhibits an equal percentage characteristic for the first 38 mm (1.5 inches) of travel, then linear characteristic.  
 2. NPS 6 easy-e with restricted Whisper Trim III not available. Use EW valve body where this trim is desired.  
 3. This column lists XT factors for Whisper Trim III cages at 100% travel.  
 4. This coefficient is minimum rather than 10% open. Valves should not be required to throttle at less than the specified minimum coefficient for an extended period of time. Erosion damage to the valve may result.

1. When using Fisher 655-EAS as a control valve for on-off service, the maximum travel for sizing purposes is 19 mm (0.75 in.).
2. When sizing self-operated regulators, use coefficients listed for 6 mm (0.25 in.) travel.
3. At 100% travel.
4. Restricted trim.

## Specifications

### Available Configurations

**ES:** Single-port, globe-style control valve with cage guiding, unbalanced valve plug, and push-down-to-close valve plug action (figures 1 and 2).

**EAS:** Angle version of ES control valve, used to facilitate piping or in applications where a self-draining valve is desired (figure 3).

### Valve Sizes

See table 3

### End Connection Styles<sup>(1)(2)</sup>

#### Cast Iron Valves.

*Flanged:* ES, NPS 1 through 8, including NPS 1-1/2 and 2-1/2 (except NPS 1-1/4), ■ CL125 flat-face or ■ CL250 raised-face flanges per ASME B16.1

#### Steel and Stainless Steel Valves.

*Flanged:* ■ CL150, 300, or 600 raised-face (RF) or ring-type joint (RTJ) flanges per ASME B16.5

*Screwed or Socket Welding:* NPS 1/2 through 2, consistent with ASME B16.11

*Buttwelding:* NPS 1 through 8 (except NPS 1-1/4). Schedules 40 or 80 consistent with ASME B16.25

### Maximum Inlet Pressures and Temperatures<sup>(1)(2)</sup>

As listed below, unless limited by maximum pressure drop or material temperature capabilities

#### Cast Iron Valves.

*Flanged:* Consistent with CL125B or 250B per ASME B16.1

#### Steel and Stainless Steel Valves.

*Flanged:* Consistent with CL150, 300, and 600<sup>(3)</sup> per ASME B16.34

*Screwed or Welding:* Consistent with flanged CL600<sup>(3)</sup> per ASME B16.34

### Maximum Pressure Drop<sup>(2)</sup>

Same as maximum inlet pressure for specific construction defined above, except where further

limited as shown in figures 6 and 7.

**Valves for NACE MR0175-2002:** See figure 6

### Shutoff Classifications per ANSI/FCI 70-2 and IEC 60534-4

**Metal Seating:** Class IV is standard. Class V is optional

**PTFE Composition Seating:** Class VI

### Construction Materials

**Body, Bonnet, and Bonnet Spacer or Bottom Flange, if used:** ■ WCC carbon steel, ■ 316 stainless steel, ■ LCC carbon steel, ■ WC9 chrome moly steel; ■ Cast iron body with steel bonnet construction.

■ Other material constructions upon request

**Valve Plug, Cage, and Metal Seating Parts:** See table 4.

**All Other Parts:** See table 9

### Material Temperature Capabilities<sup>(2)</sup>

**Body/Trim Combinations:** See tables 4 and 6.  
**Those For NACE Specification:** See tables 10 and 11.

**All Other Parts:** See table 9

### Flow Characteristics

**Standard Cages:** ■ Quick-opening, ■ linear, or ■ equal percentage

**Whisper Trim:** Linear

### Flow Directions

#### ES.

*Standard Cage:* Normally up

*Whisper Trim Cages:* Always up

#### EAS.

*Standard Cage:* Without liner, flow up or down; with liner, normally down

*Whisper Trim Cages:* Always up

### Flow Coefficients and Noise Level Prediction

See table 8 and Catalog 12

### Port Diameters and Maximum Valve Plug Travels

See table 12

- continued -

---

## Specifications (continued)

---

### Yoke Boss and Stem Diameters

See table 12

### Typical Bonnet Styles

■ Plain or ■ extension. See figures 8 and 9 for standard dimensions. See table 7 for selection guidelines

■ ENVIRO-SEAL bellows seal bonnet. See figure 5 for view of ENVIRO-SEAL bellows seal bonnet. Also, see Bulletin 59.1:070, ENVIRO-SEAL Bellows Seal Bonnets, for further information

### Packing Arrangements

**Standard Material:** Single PTFE V-ring

**ENVIRO-SEAL Packing:** See figure 4.

*ENVIRO-SEAL Packing Systems in vacuum service:* Standard ENVIRO-SEAL packing systems can be used in vacuum service with packing rings in standard orientation. Do not reverse the ENVIRO-SEAL PTFE packing rings.

Also see Bulletin 59.1:061, ENVIRO-SEAL Packing Systems for Sliding-Stem Valves, for more information.

### Approximate Weights

**NPS 1/2 and 3/4:** 9 kg (20 lb)  
**NPS 1 and 1-1/4:** 14 kg (30 lb)  
**NPS 1-1/2:** 20 kg (45 lb)  
**NPS 2:** 39 kg (85 lb)  
**NPS 2-1/2:** 45 kg (100 lb)  
**NPS 3:** 57 kg (125 lb)  
**NPS 4:** 77 kg (170 lb)  
**NPS 6:** 159 kg (350 lb)  
**NPS 8:** 408 kg (900 lb)

### Additional Options

■ Lubricator, ■ lubricator/isolating valve, ■ drilled and tapped connection in extension bonnet for leakoff service, ■ body drain plug, ■ style 3 fabricated extension bonnet made on order to a specific length for cryogenic service, and ■ Whisper Trim III cage for NPS 6 ES valve body

---

1. EN (or other) ratings and end connections can usually be supplied; consult your Emerson Process Management sales office.

2. The pressure/temperature limits in this bulletin, and any applicable standard limitations should not be exceeded.

3. Certain bonnet bolting material selections may require a CL600 easy-e valve assembly to be derated. Contact your Emerson Process Management sales office for more information

---

## ENVIRO-SEAL Packing System Specifications

### Applicable Stem Diameters

- 9.5 mm (3/8 inches), ■ 12.7 (1/2), ■ 19.1 (3/4),
- 25.4 (1), and ■ 31.8 (1-1/4) diameter valve stems

### Maximum Pressure/Temperature Limits<sup>(1)</sup>

**To Meet the EPA Fugitive Emission Standard of 100 PPM<sup>(2)</sup>.**

*For ENVIRO-SEAL PTFE and ENVIRO-SEAL Duplex packing systems: full CL300 up to 232°C (450°F)*

*For ENVIRO-SEAL Graphite packing: 104 bar (1500 psig) at 316°C (600°F)*

### Construction Materials

#### PTFE Packing Systems:

*Packing Ring and Lower Wiper: PTFE V-ring<sup>(3)</sup>*  
*Male and Female Adaptor Rings: Carbon-filled PTFE V-ring*

#### Graphite ULF Packing Systems: Graphite rings Duplex Packing Systems:

*Male and Female Adaptor Rings: Carbon-filled PTFE V-ring*

*Guide Bushings: Carbon graphite*

*Packing Rings: Graphite composite*

*Packing Washer: PTFE*

**Anti-Extrusion Washer:** Filled PTFE (not required for graphite or duplex packing)

**Lantern Ring:** S31600 (316 stainless steel) (not required for graphite packing)

**Packing Box Flange:** S31600

**Spring:** ■ 17-7PH stainless steel or ■ N06600

**Packing Follower:** S31600 lined with carbon-filled PTFE

**Packing Box Studs:** Strain-hardened 316 stainless steel

**Packing Box Nuts:** 316 stainless steel SA194 Grade 8M

1. Refer to the valve specifications in this bulletin for pressure/temperature limits of valve parts. Do not exceed the pressure/temperature rating of the valve. Do not exceed any applicable code or standard limitation.

2. The Environmental Protection Agency (EPA) has set a limit of 100 parts per million (ppm) for fugitive emissions from a valve in selected VOC (Volatile Organic Compound) services.

3. In vacuum service, it is not necessary to reverse the ENVIRO-SEAL PTFE packing rings.
