

PACIFIC

Pressure Safety Valves

- Final phase pressure safety valve manufacturing now in QLD!
- Loosely assembled stock already in Brisbane
- Brought to you by Pacific Controls

Farris Authorised Service Team (FAST) Centres are independently owned and operated, factory trained, ASME/VR certified and customer focused, to bring the PSV manufacturing process to customers locally in QLD.

Value Beyond the Valve

Farris Engineering design and manufacture superior pressure relief valves. Sometimes that may not be enough, you need more. Like a nearby inventory of replacement valves and parts. Like 24/7 valve repair or placement. Like technicians with years of valve repair experience. That's where our FAST Centre network comes in.

Farris Authorised Service Team (FAST) Centres

Over the years, Farris Engineering has developed an impressive global network of Farris Authorised Service Team (FAST) Centres. These independently owned and operated valve repair facilities are ASME and VR certified with Farris trained technicians. Our FAST Centres are customer focused and committed to "Understanding what the Customer wants... Making it happen!"

The FAST network is strong with the ability to:

- Diagnose and solve your pressure relief valve problems
- Track and manage maintenance and repair history
- Reduce plant downtime with local service, inline testing and field service capabilities
- Give you confidence that your valves will function properly during an overpressure situation
- Save money over the life cycle of the valve
- Offer asset management solutions that keep the plant safe, and deliver overall peace of mind

Local Inventory

Every Fast Centre carries a large inventory of new pressure relief valves and spare parts, backed by a Web-based global exchange program.

24/7 Valve Service and Replacement

Enjoy quick, localised testing and repair of your valves, of the prompt installation of new valves.

For Pacific Controls Service 24 Hours Emergency Support, please call 0438 339 570, 24hrs/ 7 days.

Factory Trained Technicians

FAST Centre valve technicians go through extensive training at the Farris factory and in the field.

OEM Parts

FAST Centres use only OEM parts, restoring your valves to OEM specifications. All valves are assembled and tested to ASME/AS1271 standard.

ASME/Australian Standards Certification

FAST Centres have VR certification issued by The National Board of Boiler and Pressure Vessel Inspectors.

ISO

AS/NZS ISO 9001:2008 Certification number 7462.

Mobile Repair Units

Available as required.

Valve Expertise

Every FAST Centre is backed by Farris Engineering, a leader in valve design, with over 60 years manufacturing experience.

Process Safety Management

Your nearby FAST Centre can team with Farris Engineering Services to simplify your PSM compliance requirements with PRV system audit and design services.

Emphasis on Innovation

SizeMaster™ valve sizing and selection software, Web-based inventory exchange program, iPRSM® safety audit software, and other Farris-developed technologies maintain our reputation as an industry innovator.
