Pacific Controls Service Capabilities

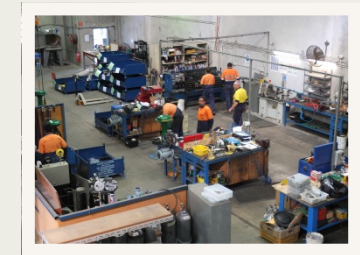

- **Mobile Valve Repair Unit (MVRU)**

Pacific Controls is pleased to extend our infield servicing using the MVRU. It is fitted with Valve and Pressure Safety Valve testing equipment where overhauling, calibration & certification can be performed onsite or outback.

- Local Inventory (Queensland)
- \$1.2M Spare Inventory
- Complete Valves & PSV In Stock

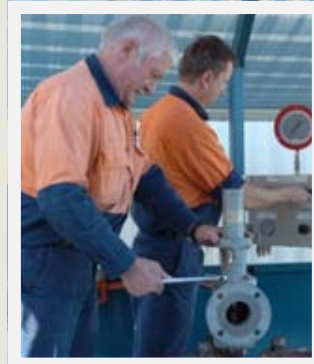

- Mobile Valve Repair Unit

Total Valve Maintenance Solutions

FARRIS AUTHROISED SERVICE

- **Engineered Services**
Providing PSVs sizing, selection and MDR Support
- **Local Inventory**
We carry a large inventory of new pressure relief valves and spare parts, backed by a Web-based global exchange program.
- **24/7 Valve Service and Replacement**
Offering quick, localised testing and repair of your valves, or the prompt installation of new ASME certified valves.

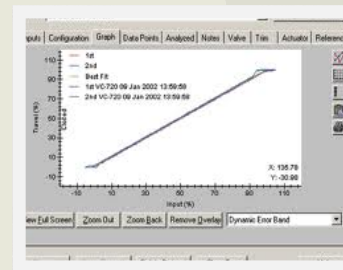

- **Factory Trained Technicians**
FAST Center valve technicians undertake extensive training at the Farris factory and ensuring fully qualified and competent personnel providing overhaul.

VALVE FLOWSCANNING & VALVELINK DIAGNOSTICS

The control valve's performance is a critical part of the process, Leveraging our advance diagnostic tools can reduce abnormal situations, excessive variability and unplanned shutdowns. Our Fisher DVC Positioners can offer this functionality and more.
